

Upgrading to InteractX Pre-Release 1.9

This release note describes how to perform a complete upgrade to InteractX Pre-Release 1.9. Use these instructions to:

- Upgrade to InteractX Development Pre-Release 1.9
- Upgrade to InteractX Runtime Pre-Release 1.9

After installing this pre-release 1.9, when you open an application created in the previous release, you will be prompted to upgrade the application. Answering Yes to this prompt will upgrade your application while answering No will allow you to open the application but you will not be able to edit it.

Your InteractX license is not affected by this upgrade. The license will be applied to this release without any action required on your part.

Upgrade Requirements

You must ensure you have the correct version numbers of the software previously installed on your system for this pre-release to install. Listed below are the version numbers you should have installed.

- InteractX Designer version: 1.80.2463
- Deployment Server version: 1.80.2463
- InteractX Runtime version: 1.80.2467 (1.80 October 2003 Update)

To determine the version numbers of your software, perform the following steps:

1. Locate the **Deployment Server** icon in the System Tray.
2. Right-click the icon, then select **Properties** from the pop-up menu.

The **Deployment Server** dialog displays.

3. Select the **InteractX** tab.

All software versions will be displayed within the dialog

Included in the above listed software is the recently released InteractX Runtime patch. This patch fixed various issues in the InteractX Runtime software release 1.8. If you do not have this patch you can download it from our web site at, <http://www.ctcusa.com>.

To download and install the InteractX Runtime release 1.8 patch, perform the following steps:

1. Select **Support** from our web site, then select **Enter the CTC Forum** link from the Support web page.

The **CTC Forum** login page loads.

2. Enter your login information, then scroll down to the **InteractX** section.
3. Select **Version Updates**, then **InteractX 1.80 Update - October 2003**.
You will notice a ZIP file on this page.
4. Download the ZIP file to your system.
5. Extract the ZIP file.
6. Double-click the ItrXUD101303.msi file to install the runtime patch on your system.
7. Reboot your system.
The InteractX Runtime release 1.80 patch is now installed on your system.

Upgrading to InteractX Development Pre-Release 1.9

Upgrading from InteractX Development release 1.8 to InteractX Development pre-release 1.9 is a straightforward process. Follow the steps below to upgrade your installation to this release.

1. Insert the InteractX Pre-Release 1.9 CD into your CD-ROM drive.
The CD auto starts and you will see this PDF document. Locate the MSI files on your CD and complete these steps.
2. Double-click the following MSI files, in order and one at a time, to launch their unique installation wizards - MachineShop Suite.msi, InteractX.msi, and InteractXDST.msi file(s).
3. Select **Remove** from the installation dialog when it appears.
MachineShop Suite, InteractX, and the InteractX DST are removed from your system.
4. Open the **Windows Control Panel - Add/Remove Programs** dialog. Ensure that MachineShop Suite, InteractX, and the InteractX DST have been removed from your system.
5. Select **InteractX Setup and Install Program**, then select **Remove**.
6. Double-click the following MSI files, in order and one at a time, to launch their unique installation wizards the second time - MachineShop Suite.msi, InteractX.msi, and InteractXDST.msi file(s).
7. Follow the directions given in the installation wizard(s).
8. Reboot your system.
MachineShop Suite, InteractX, and the InteractX DST have been successfully installed. Now you must update your previous applications to this latest version by simply opening them within this pre-release.

Upgrading to InteractX Runtime Pre-Release 1.9

Upgrading from InteractX Runtime release 1.8 to InteractX Runtime pre-release 1.9 is a straightforward process. Follow the steps below to upgrade your installation to this release.

1. Insert the InteractX Pre-Release 1.9 CD into your CD-ROM drive.
The CD auto starts and you will see this PDF document. Locate the MSI files on your CD and complete these steps.
2. If it is running, close the **Deployment Server**, located in your System Tray, by right-clicking the Deployment Server icon.
3. Select **Shutdown** from the pop-up menu.
The **Deployment Server** will close.
4. Double-click the following MSI files, in order and one at a time, to launch their unique installation wizards - InteractXRuntime.msi and the InteractX Deployment.msi file(s).
5. Select **Remove** from the installation dialog when it appears.
InteractX Runtime and the Deployment Server are removed from your system.
6. Open the **Windows Control Panel - Add/Remove Programs** dialog. Ensure that InteractX Runtime and the InteractX Deployment Server have been removed from your system.
7. Select **InteractX Setup and Install Program**, then select **Remove**.
8. Double-click the following MSI files, in order and one at a time, to launch their unique installation wizards the second time - InteractXRuntime.msi and the InteractX Deployment.msi file(s).
9. Follow the directions given in the installation wizard(s).
10. Reboot your system.
InteractX Runtime and the Deployment Server have been successfully installed.
